CrabappleDental®

Dr. Sarah Roberts
12670 Crabapple Road
Suite 110
Alpharetta GA 30004

Dr. Sarah Roberts

Dr. Sarah Roberts earned her Doctor of Dental Medicine degree at the University of Louisville and her Pharmacy degree at Purdue University. Dr. Roberts is an eternal student and has completed much continuing education with a focus towards aesthetic dentistry. She is currently working on a mastership at the highly acclaimed Las Vegas Institute for Advanced Dental Studies. In addition, she has completed an esthetic continuum at the Nash Institute. Taking these high level classes has enabled Dr. Roberts to deliver the highest quality of care possible with modern dental techniques and materials. She has over 200 hours of continuing education this year and only 20 are required for licensure.

Dr. Roberts is a member of the American Dental Association, Georgia Dental Association, and the Academy of Cosmetic Dentistry. Dr. Roberts grew up in Indiana and now lives in Alpharetta with her husband, Philip and their two daughters Chloe and Natalie. She enjoys reading, shopping, swimming and spending time relaxing with her family. Dr. Roberts takes delight in treating patients of all ages. She often volunteers at the local schools to talk about dental health to the students.

New Technology finds Ultra-Small Cavities

Have you been to the dentist only to find a cavity requiring a large filling that wasn't there six months ago? Truth is, the decay had been present for months – even years – but it was too small to be detected by conventional x-ray systems. Crabapple Dental uses a new technology, the Diagnodent Laser Scanner to find super small cavities months or years earlier. Early detection allows for the flexibility of invisible bonded fillings.

Sedation Dentistry Makes Your Visit a Relaxing One

You can rest easy knowing your visit to the dentist's office will be relaxing and comfortable. By offering oral conscious sedation, Dr. Sarah Roberts bridges the gap between technology and comfort.

Intra-Oral Camera Makes You Part of Our Team

Have you ever wondered what the dentist finds in your mouth? Dr. Roberts uses an intra-oral camera, projecting a close-up picture of your mouth on a private computer screen. Healthy teeth and potential problem teeth are pointed out. Together, you discuss the steps necessary to get your dental health on track. Rave reviews have made this technology a favorite for patients of all ages

Experience the Difference with Crabapple Dental

- ☺ Crabapple Dental is committed to providing the same high standards they demand for their own families.
- ☺ Your dental condition and treatment options are clearly explained and discussed before any work is begun.
- ☺ Each team member engages in special training to make sure you receive the most advanced care available.
- ☺ The Crabapple Dental staff loves what they do! You'll be amazed at what this fabulous team can do for you.
- ☺ You just might find yourself looking forward to your next dental appointment.

Optimum Sterilization & Cleanliness

Dr. Roberts' highest priority is patient safety and cleanliness. In addition to the following strict guidelines set forth by the American Dental Association, Crabapple Dental contracts with a sterilization monitoring service to ensure your safety.
